

Home Fragrance Kit

Ingredients are for ONE kit. If you want to make multiple kits, multiply the noted amounts by however many kits you want to create.

- 1 whole cinnamon stick
- 6 whole allspice
- 1 tsp whole cloves
- A few tbsp of Christmas tree pine needles – dried
OR 2 tbsp of dried rosemary
OR 2 tbsp of dried juniper or cedar

Step One: Crush the spices

What I do is take the dried spices and place them in a baggie and use a hammer to smash them before bagging them up for the gift. That helps release the fragrance.

Step Two: Combine in a bag or container

Place all the dried ingredients in a bag and add a few marbles. (Or you can have them bagged separately if you wish)

Be sure to say in the instructions why the marbles are there.

Step Three: Add a Fresh Element

If you want this to have an extra punch of fragrance, include a small tangerine or orange with the kit. Tell them to eat the citrus and toss the fresh peels into the pot with the water when they use the kit and it will add fragrance to their house for the holidays.

Step Four: Instructions

Write up instructions for the recipient. Just say to add the contents to a small saucepan of water and simmer for 15 minutes to release fragrance into the home.
